

## Pisa Galileo Airport Reviews

Pisa International Airport (Italian: Aeroporto Internazionale di Pisa) (IATA: PSA, ICAO: LIRP), formerly Galileo Galilei Airport and San Giusto Airport is an airport located in Pisa, Italy.

Pisa Galileo Airport is the main airport in Tuscany. It is named after Galileo Galilei, the famous scientist and native of Pisa. The airport was first developed for the military in the 1930 and 1940s. The airport had its own railway station with a service to and from Pisa Central railway station but this was closed on 15th December 2013 to allow construction work to begin on a new fully automatic connection to be known as the Pisa Mover to take passengers to Pisa Central - at the moment a direct bus makes the connection.

The Pisa Galileo Airport was used by 4,526,723 passengers in 2011.
